

30. Morphological Operation – Dilation

Aim

To perform morphological dilation on an image using OpenCV.

Procedure

1. Read the image.
2. Convert it to grayscale.
3. Create a morphological kernel.
4. Apply dilation using cv2.dilate().
5. Display the images.

Program

```
import cv2
import numpy as np

img = cv2.imread("image.jpg")

gray = cv2.cvtColor(img, cv2.COLOR_BGR2GRAY)

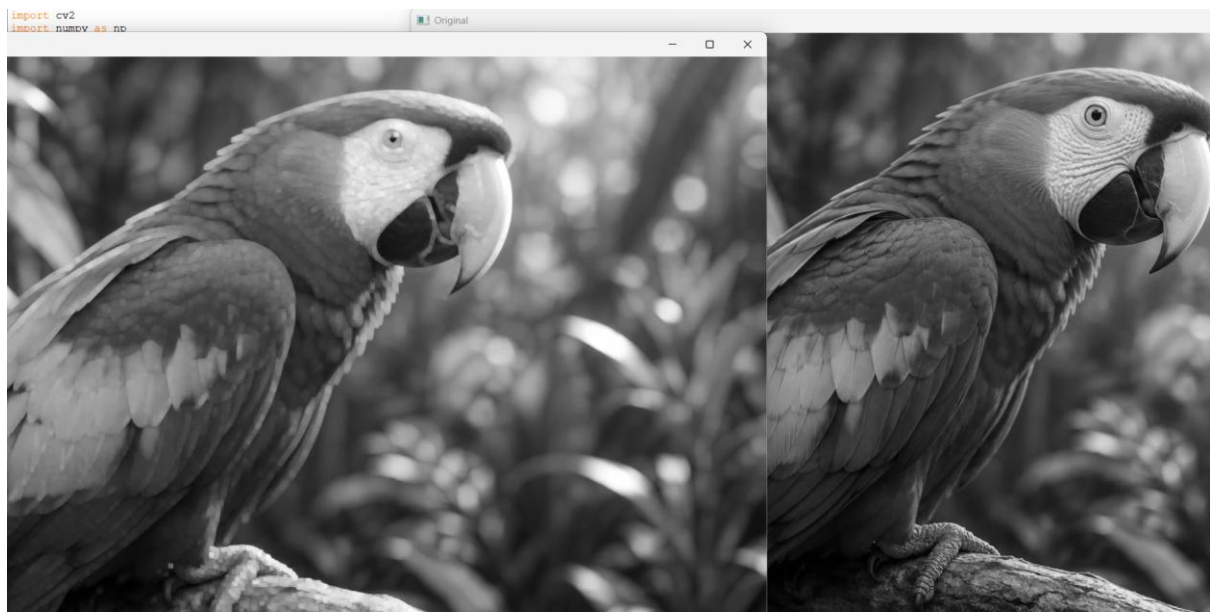

kernel = np.ones((5, 5), np.uint8)

dilation = cv2.dilate(gray, kernel, iterations=1)

cv2.imshow("Original", gray)
cv2.imshow("Dilation", dilation)

cv2.waitKey(0)
cv2.destroyAllWindows()
```

output

Result

The given image was successfully dilated using the morphological dilation technique.
